FRP Housing

PNC®
Pure & Cure Technology

Welcome to the premium industrial source for water treatment components. We help treat your water in a better way. The variety of top class featured companies have listed their products through the platform created by Pure-N-Cure Technology (PNC). In our constant endeavor to make complex solutions look simple, PNC has selected the best products across the world to serve our valued customers. Be it Pumps, Membranes, Membrane Housings, Chemicals, Dosing Pumps, Ion Exchange Resins, MPV's, variable frequency drives, Hydro-pneumatic Tanks/systems, PVC/PVDF pipes and fittings, Valves, Digital Instrumentations. We have pool of satisfied customers due to our excellent sales and service network throughout India. We provide complete well supported after sales service training courses, seminars and technical symposiums to all for water/waste water treatment.

www.purencure.com

Important Features:

- Available in FRP and Stainless Steel in 2.5", 4" and 8" dia meter.
- FRP Housing manufactured as per ASME Sec X
- Available in end port and side port and multiport configurations
- Available in pressure ratings of 300 to 1200 psi and can accommodate any standard make of up to 8 inch diameter membrane
- Matrix FRP RO Housings have mirror finish inside for quick and easy loading and unloading of membranes and the outsides are coated with high gloss paints for UV protection.
- Matrix RO SS Housings are made out of seamless stainless steel material either in SS 304 or SS316 L. These are available in internal and external mirror finish.
- Matrix RO SS Housings are available in pressure ratings of 350 psi and can accommodate any standard make of up to 8 inch diameter membrane. Housings are available with ABS end caps or flanged end
- All Matrix RO Housings are supplied with O Rings, Saddles and Straps with screws as standard supply.

Features				Benefits			
<ul style="list-style-type: none"> • Glossy ID finish • Precise bore diameter • Easy head locking system • Multiside porting option • Head locking groove integrally wound • Weeping at 4 times the design pressure 				<ul style="list-style-type: none"> • Prevents growth of organic matter and ease in loading and unloading of membrane. • Better membrane sealing and ease in loading & un-loading. • Quick access to membranes & eliminates use of tools. • Reduces investment or manifolds. • Better strength • Fail safe shell, prevents catastrophic failure
